Series I Plans

(10 flat file drawers)

Series I: Plans contain 1760 plans dating from c.1891-c.1958. The majority of the plans are for vessels designed by George Owen. Most of his design legacy is intact in this series. Owen primarily designed sailing yachts and, therefore, yacht plans comprise the bulk of the collection. There are also plans for power yachts and commercial vessels present in the collection. Throughout his career, Owen designed new rigs for his own designs and for vessels by other naval architects. These rigging plans are also in the collection. The majority of plans in the collection come from Owen's private practice, though there are plans from the years of Owen's association with Francis Minot and other naval architects and shipyards. Also included in this series are plans drawn specifically for small half-hull models with wooden sails that Owen commissioned from E. H. Peterson and Owen's first year drawings as a mechanical engineering student at MIT.

Occasional gaps in the design numbering sequence (particularly in the Owen and Minot years) suggest that some plans associated with Owen are elsewhere or have not survived. Additionally, it is important to note that there are few tables of offsets. Owen occasionally wrote references to "offset books" on the plans. These offset books are not present in the collection, and may have been discarded after his death. Lines plans are available for most designs, however.

Judging by the handwriting on the plans, Owen had several assistant draftsmen over the years, the most prolific of whom worked from c.1910-c.1914. This draftsman became particularly adept at mimicking Owen's handwriting. Neither Owen nor any of his draftsmen indicated initials or names on the plans. The plans are mostly drawn on vellum and tracing cloth. In general, they are in good condition.

Note on Physical Plan Order

The plans are arranged by Owen's original design numbers, if known, and then arranged within each design by object numbers (plan numbers), assigned by the project archivist. This provides a roughly chronological order. Each plan has a unique object number, such as GO.1.59. "GO" indicates that it is part of the George Owen Collection, "1" indicates that it is part of series 1 (plans), and the subpoint, in this case "59," indicates a specific plan. An additional subpoint, such as GO.1.59.1, indicates that the plan is a copy of, or attachment to, another plan.

The organization is presumed to be similar to Owen's original order. Some reordering of the collection was imposed, however. If a plan applies to more than one design, it is filed under the lowest (earliest) design number. Unnumbered designs are arranged

chronologically or by type of vessel when date is unknown. Plans by other naval architects are filed at the end of the series, unless they are directly associated with an Owen plan.

Series I: Plans is arranged into six subseries:

- Numbered designs
- Unnumbered, dated designs
- Unnumbered, undated designs
- Plates of first-year mechanical engineering
- Sketches for E. H. Peterson half-hull models
- Plans by other naval architects

Microfilm

All of the plans were microfilmed in the order described above. The following is a list of microfilm reels containing Series I. An appointment must be made to view film.

<u>Reel #</u>	<u>Design #s</u>	<u>Object #s</u>
GEOO.1.1R	1 - 57	GO.1.1 - GO.1.340
GEOO.1.2R	58 - 94	GO.1.341 - GO.1.706
GEOO.1.3R	95 - 135	GO.1.707 - GO.1.1074
GEOO.1.4R	136 - 204	GO.1.1075 - GO.1.1384
GEOO.1.5R	205 - misc.	GO.1.1385 - GO.1.1708

Ordering Copies of Plans

Please refer to the Hart Nautical Collections Plan Policy in the “research services” section of the “collections and research” page of MIT Museum’s web site. Print costs and publication fees are also located in this section. All requests for plans must be in writing to:

Curator
Hart Nautical Collections
MIT Museum
265 Massachusetts Ave.
Cambridge, MA 02139
617-258-9107 (fax)
kurt@mit.edu

Please include the following information with your request:

1. Your name and mailing address.
2. Vessel name and/or design number.
3. Plan type and object number from list below.
4. Purpose of interest.

List of the Plans

The following list of plans in the George Owen Collection was created as a report from the larger primary database (see Appendix A in Introduction and Owen Design List PDF) of this collection. Nine fields were selected and reported here to provide an overview of the vessels represented in the Owen Collection and the related plans. The listed plan order is similar to the physical arrangement of the plans as described above. The plans with no design numbers that fall at the end of the list are ordered by object number (in the order they were processed). For a listing of vessel names designed by Owen, see Appendix A (Introduction and Owen Design List PDF).

Searching

In addition to browsing the list of plans, you will likely wish to use the “search” or “find” functions available in PDF readers. This function is usually under Edit on the tool bar at the top.

Explanation of Fields

Object # = Object number of the plan, created by the project archivist. Each plan has a unique object number. Plans that are subpointed, such as GO.1.59.1, are copies of or attachments to another plan.

Plan Type = Chosen by the project archivist from the following list of categories:

accmdtn dtl = accommodation detail	list = list
bt hndling dtl = boat handling detail	mchnry arrgt = machinery arrangement
const = construction	mchnry dtl = machinery detail
deck stretr = deck structure	non-boat = non-boat
dsgn curve = design curve	offsets = offsets
docking = docking plan	plmbng dtl = plumbing detail
elctrcl dtl = electrical detail	profile = outboard profile
eng arrgt = engine arrangement	prpllr dtl = propeller detail
engine dtl = engine detail	rig dtl = rig detail
gnl arrgt = general arrangement	sail = sail plan/outboard profile
hrdwr dtl = hardware detail	sail ctg = sail cutting plan/gore plan
hull dtl = hull detail	section = section
inbrd profile = inboard profile	shaft dtl = propeller shaft detail
keel dtl = keel detail	spar = spar plan
lines = lines	strng dtl = steering detail (e.g. rudder)

Orig. Yr. = Year when the plan was originally drawn. If the year is unknown, this field is left blank. Revision dates are noted in a separate field in the database, not reproduced here.

Vessel Name = Original name of the vessel, with later names in parentheses. Names of vessels are always in caps.

Des. # = Owen's design number, usually written on the plan. An asterisk indicates that the design number was not written on the plan but could be determined accurately by comparison with other plans. No design # indicates that the design is not Owen's, that Owen did not assign a design # (model plans, student work, rig contracts, etc.), or that the plan was not produced by Owen.

Vessel Type = Type name given by creator of plan combined with bracketed type name assigned by project archivist. Question mark added when type is not certain.

O. A. = Length overall.

B. = Beam.

D. = Draft.
